Aims and scope
Physica B (*Condensed Matter*) contains papers and review articles in the realm of physics of condensed matter. Both experimental and theoretical contributions are invited, although theoretical papers should preferably be related to experimental results.

Abstracted/indexed in:
Current Contents: Physical, Chemical and Earth Sciences; Aluminium Industry Abstracts, EI Compendex Plus, Engineered Materials Abstracts, Engineering Index, INSPEC, Metals Abstracts, Physics Briefs

Subscription information
Physica B (ISSN 0921-4526) is published semimonthly except monthly in March, September, October, November, December. For 1996, volumes 215–228 are scheduled for publication. Subscription prices are available upon request from the Publisher. A combined subscription with *Physica A*, *Physica C* and *Physica D* is available at a reduced rate.

Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by surface mail except to the following countries where air delivery via SAL is ensured: Argentina, Australia, Brazil, Canada, China, Hong Kong, India, Israel, Japan, Malaysia, Mexico, New Zealand, Pakistan, Singapore, South Africa, South Korea, Taiwan, Thailand, USA. For all other countries air mail rates are available upon request. Please address all enquiries regarding orders and subscriptions to:

Claims for issues not received should be made within six months of our publication (mailing) date.

US Mailing Notice
Physica B (ISSN 0921-4526) is published semimonthly except monthly in March, September, October, November, December (19 issues) by Elsevier Science, Molenwerf 1, P.O. Box 211, 1000 AE Amsterdam, The Netherlands. The annual subscription price in the USA is US$ 3686 (valid in North, Central and South America only), including air speed delivery. Second class postage paid at Jamaica, NY 11431.
USA postmasters: Send address changes to Physica B, Publications Expediting Inc., 200 Meacham Avenue, Elmont, NY 11003.

INSTRUCTIONS TO AUTHORS

Submission of papers
Manuscripts (one original + two copies) should be sent to one of the following regular editors:

Prof. Dr. F.R. de Boer, Amsterdam
Dr. Z. Fisk, Tallahassee, FL
Dr. R. Jochemsen, Leiden
Dr. G.H. Lander, Karlsruhe
(Addresses: see p. 2 of cover)

Original material: Submission of a manuscript implies that it is not being simultaneously considered for publication elsewhere and that the authors have obtained the necessary authority for publication.

Types of contributions
Original research papers and letters to the editor are welcomed. Both should contain an Abstract (of up to 200 words) and a Conclusions section, which, particularly in the case of theoretical papers, translates the results into terms readily accessible to most readers.

Manuscript preparation
All manuscripts should be written in proper English. The paper copies of the text should be prepared with double line spacing and wide margins, on numbered sheets.
Structure: Please adhere to the following order of presentation: Article title, Author(s), Affiliation(s), Abstract, PACS codes and keywords, Main text, Acknowledgements, Appendices, References, Figure captions, Tables.
Corresponding author: The name, complete postal address, telephone and fax numbers and the E-mail address of the corresponding author should be given on the first page of the manuscript.
PACS codes / keywords: Please supply one or more relevant PACS-1995 classification codes and 3 keywords of your own choice for indexing purposes.
References: References to other work should be consecutively numbered in the text using square brackets and listed by number in the Reference list.

Illustrations
Illustrations should also be submitted in triplicate: one master set and two sets of copies. The *line drawings* in the master set should be original laser printer or plotter output or drawn black india ink, with careful lettering, large enough (3–5 mm) to remain legible after reduction for printing. The *photographs* should be originals, with somewhat more contrast than is required in the printed version. They should be unmounted unless part of a composite figure. Any scale markers should be inserted on the photograph itself, not drawn below it.
Colour plates: Figures may be published in colour, if this is judged essential by the editor. The publisher and the author will each bear part of the extra costs involved. Further information is available from the publisher.

After acceptance
Notification: You will be notified by the Editor of the journal of the acceptance of your article.
Copyright transfer: In the course of the production process you will be asked to transfer the copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Electronic manuscripts
The publisher welcomes the receipt of an electronic version of your accepted manuscript. If there is not already a copy of this (on diskette) with the journal editor at the time the manuscript is being refereed, you are invited to send a file with the text of the accepted manuscript directly to the Publisher on diskette (allowed formats 3.5″ or 5.25″ MS-DOS, or 3.5″ Macintosh) to the address given below. Please note that no deviations from the version accepted by the Editor of the journal are permissible without the prior and explicit approval of the Editor. Such changes should be clearly indicated on an accompanying printout of the file.

Author benefits
No page charges: Publishing in Physica B is free of charge.
Free offprints: The corresponding author will receive 50 offprints free of charge. An offprint order form will be supplied by the publisher for ordering any additional paid offprints.
Discount: Contributors to Elsevier Science journals are entitled to a 30% discount on all Elsevier Science books.

Handbook on the Physics and Chemistry of Rare Earths

Edited by **K.A. Gschneidner, Jr.** and **L. Eyring**

VOLUME 21

©1995 434 pages Hardbound
Price: Dfl. 330.00 (US$206.25)
ISBN 0-444-82178-3

The contributions to this volume focus on selected chemical aspects of rare-earth materials. The topics covered range from a basic treatment of crystalline electric-field effects and chemical interactions in organic solvents, to separation processes, electrochemical beaviors which impact corrosion, oxidation resistance, chemical energy storage and sensor technology, and to analytical procedures.

Contents: Preface. Contents of volumes 1-20.
139. Separation chemistry *(R.G. Bautista).*
140. Corrosion prevention and control *(B.W. Hinton).*
141. High-temperature corrosion protection *(N.E. Ryan).*
142. Rare earth intermetallics for metal-hydrogen batteries *(T. Sakai, M. Matsuoka, C. Iwakura).*
143. Chemical sensors *(G.-y. Adachi, N. Imanaka).*
144. Crystal field in non-metallic (rare-earth) compounds *(D. Garcia, M. Faucher).* 145. Solvation and anion interaction in organic solvents *(J.-C.G. Büzli, A. Milicic-Tang).*
146. Trace determination of lanthanides in high-purity rare-earth oxides *(V. Bhagavathy, T. Prasada Rao, A.D. Damodaran).*
Author index. Subject index.

VOLUME 22

©1996 816 pages Hardbound
Price: Dfl. 545.00 (US$340.75)
ISBN 0-444-82288-7

This volume covers various physical aspects of a wide range of rare-earth materials. Magnetic phenomena dominate the contents of the first four chapters which deal with thin films and layered structures, and intermetallic and nonmetallic compounds. The remaining two chapters deal with coherent emission and electronic structure calculations of lanthanide molecules.

Contents: Preface. Contents of volumes 1-21.
139. Separation chemistry
147. Synthesis and properties of single-crystal nanostructures *(C.P. Flynn, M.B. Salamon).*
148. Nanoscale rare earth-transition metal multilayers: magnetic structure and properties *(Z.S. Shan, D.H. Sellmyer).*
149. The $ThNm_{12}$-type compounds of rare earths and actinides: structure, magnetic and related properties *(W. Suski).*
150. Magnetic properties of nonmetallic lanthanide compounds *(L.K. Aminov, B.Z. Malkin, M.A. Teplov).*
151. Coherent emission in rare-earth materials *(F. Auzel).*
152. Electronic structure calculations for milecules containing lanthanide atoms *(M. Dolg, H. Stoll).*
Author index. Subject index.
